

PIETRO G. M. CALDERONI

Management Engineering Student | IT & Operations

About me

Management Engineering student (IT specialization) with a passion for using technology to optimize operational processes and solve complex business challenges. At FacolCup, I coordinated a 20-people staff and managed events involving over 1,000 attendees, while redesigning operational workflows through a structured Google Drive system and automated communication templates — cutting process time by 60% with a solution presently in use by the organisation. I combine strong analytical and problem-solving skills with empathy to lead cross-functional teams towards specific goals, monitoring progress and results.

Experience

Operations & Event Management Staff Sep 2023 – Sep 2025 FacolCup

Contributed to the management and execution of a major inter-university sports tournament, balancing academic studies with hands-on management experience in a highly complex scenario.

- **Team Coordination and Operations:** Coordinated operations across a 20-people team. Managed on-field technical operations and actively contributed to the organisation of the official finals at Viola Park, successfully handling an event with approx. 1,500 spectators.
- **Document Management and Compliance:** Organised and validated official documentation for 8 teams, managing procedures for over 240 people, ensuring strict regulatory compliance and accuracy.
- **Institutional Relations:** Managed formal relationships and official communications (via PEC) with top-level stakeholders, including the Municipality of Florence, the Tuscany Region, and National Ministries (Sport, Culture, University).
- **Process Optimisation:** Streamlined internal and external communications, implementing rapid solutions to bypass practical as well as bureaucratic delays, and resolve last-minute contingencies.
- **Key Achievement:** 🏆 Awarded by the Association President on stage at Palazzo Vecchio — in the presence of the Mayor of Florence — for outstanding contributions to the event's success during the opening ceremony.

Academic Business Case – "Chinéo" Nov 2024 – Dec 2024

- Conceived and developed a comprehensive business plan for a simulated smart mobility startup, designing a software concept to create temporary "green waves" for emergency vehicles in congested urban areas.
- Drafted a 3-year forward-looking company report, assessing financial feasibility, operational requirements, and market impact.
- Collaborated effectively within a 5-people team, aligning diverse perspectives to achieve a shared strategic goal and honing crucial teamwork and project management capabilities.

Education

B.Sc. in Management Engineering, 2022 – exp. Oct 2026 IT specialization University of Florence

Scientific High School Diploma 2017 – 2022 Liceo Scientifico Guido Castelnuovo, Florence

I authorize the processing of my personal data in compliance with the Italian Legislative Decree no. 196/2003 and the GDPR (EU Regulation 2016/679).
